Introduction to corrosion UrÅ¼ka HribÅ¼ek Mentor: prof. dr. Å½iga Å mit April 5, 2014 Abstract This seminar presents the problem of corrosion of metals and alloys. An introduction is made about the types of corrosion, the damage it causes and the significance of recognition of the corrosion mechanisms.

Introduction to corrosion - University of Ljubljana

Galvanic corrosion is an electrochemical action of two dissimilar metals in the presence of an electrolyte and an electron conductive path. It occurs when dissimilar metals are in contact. Control of galvanic corrosion is achieved by using metals closer to each other in the galvanic series or by electrically isolating metals from each other.

CHAPTER I INTRODUCTION TO CORROSION - Shodhganga

Corrosion is the deterioration of materials by chemical interaction with their environment. The term corrosion is sometimes also applied to the degradation of plastics, concrete and wood, but generally refers to metals.

Introduction to corrosion 3 1.3 Corrosive Environment Corrosion cannot be defined without a reference to environment. All environments are corrosive to some degree. Following is the list of typical corrosive environments: (1) Air and humidity. (2) Fresh, distilled, salt and marine water. (3) Natural, urban, marine and industrial atmospheres.

Introduction to Corrosion Monitoring What is Corrosion Monitoring? The field of corrosion measurement, control, and prevention covers a very broad spectrum of tech- ... • Corrosion deposits can be observed and analyzed. • Weight loss can be readily determined and corrosion rate easily calculated.

Introduction to Corrosion Monitoring

Introduction • Corrosion is a general term used to describe various interactions between a material and its environment leading to a degradation in the material properties. • Interaction with ambient oxygen can cause the formation of oxide layers via diffusion controlled growth.
