Talairach coordinates, also known as Talairach space, is a 3-dimensional coordinate system (known as an 'atlas') of the human brain, which is used to map the location of brain structures independent from individual differences in the size and overall shape of the brain. It is still common to use Talairach coordinates in functional brain imaging studies and to target transcranial stimulation of ...

These graphics from the NUCCA site also show further the types of sublaxations that can occur at the upper cervical spine level. Which one actually occurs in each individual really depends upon their prevailing anatomy at that level and the direction and amplitude of the force imparted during the trauma they received.

Phenotype / cell stem origin: Pan-B antigens test positive. The immunophenotypic profile is CD10+, CD5-, sIg+ and the cell of origin is a germinal centre B-cell that has encountered the antigen.

Follicular lymphoma (FL)

Figure 2. Functional Connectivity Variability Quantified across Cortical Networks. The analysis was based on our prior parcellation of the cerebrum (Yeo et al., 2011) into seven functional networks (top row), namely the frontoparietal control (FPN), ventral and dorsal attention (vATN, dATN), default (DN), limbic (LMB), sensory-motor (Mot), and visual (Vis) networks.
