Nowadays a lot of different subjects are classified in the "bio" area: from materials inspired by biological microstructures for high-tech applications, to artificial bio-compatible tissues, from the imitation of efficient movements of some animal species to the design of surfaces for superior biocompatibility and many more could be cited.

Biomimetics or biomimicry is the imitation of the models, systems, and elements of nature for the purpose of solving complex human problems. The terms "biomimetics" and "biomimicry" derive from Ancient Greek: βίος (bios), life, and μίμησις (mimēsis), imitation, from μέθει (meisthai), to imitate, from μίμος (mimos), actor. A closely related field is bionics.

Bioceramics and bioglasses are ceramic materials that are biocompatible. Bioceramics are an important subset of biomaterials. Bioceramics range in biocompatibility from the ceramic oxides, which are inert in the body, to the other extreme of resorbable materials, which are eventually replaced by the body after they have assisted repair. Bioceramics are used in many types of medical procedures.

This review reports the recent advances in the most important and straightforward synthetic protocols for incorporating catechols into (bio)polymers, and discusses the emerging applications of these innovative multifunctional materials in biomedical, energy storage and environmental applications.

About IWBD. The Ninth International Workshop on Bio-Design Automation (IWBD) will bring together researchers from the synthetic biology, systems biology, and design automation communities to discuss concepts, methodologies and software tools for the computational analysis and synthesis of biological

systems.. The field of synthetic biology, still in its early stages, has largely been driven ...

Phyllis Schlafly has been a national leader of the conservative movement since the publication of her best-selling 1964 book, *A Choice Not An Echo*. She has been a leader of the pro-family movement since 1972, when she started her national volunteer organization now called Eagle Forum.

As promised, here are the details on the Electrolux Bio Robot Refrigerator, a concept that has been making quite a splash in the blogosphere! In lay terms, the fridge is a concept where the Bio Robot cools biopolymer gel through luminescence. A non-sticky gel surrounds the food item when shoved into the biopolymer gel, creating separate pods.

Wow what an amazing resource. I have my BA in Art History and worked at the Corcoran Gallery of Art in Washington D.C. during the 90s there were several shows that included the work of Keith Haring.
