Python is an interpreted high-level programming language for general-purpose programming.Created by Guido van Rossum and first released in 1991, Python has a design philosophy that emphasizes code readability, notably using significant whitespace.It provides constructs that enable clear programming on both small and large scales. In July 2018, Van Rossum stepped down as the leader in the ...

Python (programming language) - Wikipedia
except that if x is an expression, it is evaluated only once. The difference is significant if evaluating the expression has side effects. This shorthand form is sometimes known as the Elvis operator in other languages.. C++. Unlike in C, the precedence of the ?: operator in C++ is the same as that of the assignment operator (= or OP=), and it can return an lvalue.
