A biological system is a complex network of biologically relevant entities.. Biological organization spans several scales. Examples of biological systems at the macro scale are populations of organisms. On the organ and tissue scale in mammals and other animals, examples include the circulatory system, the respiratory system, and the nervous system.. On the micro to the nanoscopic scale ...

Biological system - Wikipedia

Abstract. A network of disorders and disease genes linked by known disorder-gene associations offers a platform to explore in a single graph-theoretic framework all known phenotype and disease gene associations, indicating the common genetic origin of many diseases.

The human disease network | PNAS

Abstract In reviewing national health systems assessments (HSAs), we identify four primary rationales for doing HSAs: (i) to motivate health systems reform, (ii) to promote harmonization and alignment across actors in the health system, (iii) to help translate health systems reforms into meaningful ways to track performance, and (iv) to facilitate learning through cross-country comparisons.

Assessing National Health Systems: Why and How: Health

A self-replicating machine is a type of autonomous robot that is capable of reproducing itself autonomously using raw materials found in the environment, thus exhibiting self-replication in a way analogous to that found in nature. The concept of self-replicating machines has been advanced and examined by Homer Jacobsen,
