The Journal of Hazardous Materials publishes full-length research papers, review articles, and case studies that improve our understanding of the hazards and risks that certain materials pose to public health and the environment. Papers that deal with ways of controlling and mitigating risks of hazardous materials (HM) are within the scope of the journal.

Optimization of the reaction atmosphere facilitated the control over the etching rate and also the stability of the Cu nanostructures. The average diameter and length of the NWs were 67.4 nm and 44 Î¼m, respectively, and the aspect ratio was around 650.However, for further reduction in the diameter, the reduction rate should be enhanced.
