Scientific Reports is an online open access, scientific mega journal published by Nature Research, covering all areas of the natural sciences. The journal aims to assess solely the scientific validity of a submitted paper, rather than its perceived importance, significance or impact.

Scientific Reports - Wikipedia

Nature, in the broadest sense, is the natural, physical, or material world or universe. "Nature" can refer to the phenomena of the physical world, and also to life in general. The study of nature is a large, if not the only, part of science. Although humans are part of nature, human activity is often understood as a separate category from other natural phenomena.

A scientific model is a simplified abstract view of a complex reality. Scientific models are used as a basis for scientific work. They can be used to explain, predict, and test, or to develop computer programs or mathematical equations.. An example of a complex model is the software used for weather forecasts. The program is based on equations for the variables which affect weather.
