Psychology is the science of behavior and mind, including conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope and diverse interests that, when taken together, seek an understanding of the emergent properties of brains, and all the variety of epiphenomena they manifest. As a social science it aims to understand individuals and groups ...

Overview. Some of the issues studied by the philosophy of psychology are epistemological concerns about the methodology of psychological investigation. For example: What is the most appropriate methodology for psychology: mentalism, behaviorism, or a compromise? Are self-reports a reliable data-gathering method?; What conclusions can be drawn from null hypothesis tests?
