It's no surprise to some people that as many as 18 percent of those brought back to life after a heart attack have had near-death experiences. To others, the idea that human consciousness and the body can exist distinctly from each other seems unscientific. However, if there is no existence beyond ...

Sword of Tipu Sultan - Agniveer

A critical step in the reliable use of the Myers-Briggs Type Indicator is verification of type through a dialogue between the individual completing the inventory and the practitioner interpreting the results. After receiving the results, the client will read the description of the personality type, in the aggregate, to determine if it is largely accurate.
