Despite India's 50% increase in GDP since 1991, more than one third of the world's malnourished children live in India. Among these, half of the children under three years old are underweight and a third of wealthiest children are over-nutriented.. One of the major causes for malnutrition in India is economic inequality. Due to the low social status of some population groups, their diet often ...

As an aside, though also related, in terms of the economic situation, it has been common, as the above briefing is titled, to blame the victim on causes of poverty, corruption, lack of development, and so forth. This has often applied to Africa, as well as other regions around the world when discussing such things in the mainstream.

The research that has been conducted over the last 5â€“10 years shows that attentional capture by food images tends to be more pronounced in those participants who are hungry than in those who are sated (Piech, Pastorino, & Zald, 2010; see also Siep et al., 2009). Attentional capture is also higher in response to food images that are judged to be more pleasant (di Pellegrino, Magarelli ...
