Marine Electronics Forum - Suzuki NMEA 2000 network + standard Suzuki gauges - it can be done -  
IMPORTANT NOTE January 2017: I have now prepared a

**Suzuki NMEA 2000 network + standard Suzuki gauges - it can**

be done. The NMEA 2000 network is a CAN bus system that allows for a wide range of sensors and gauges to be connected to a single power source. This is a significant improvement over the traditional NMEA 0183 system, which requires a separate power source for each gauge. The NMEA 2000 system is also more reliable and easier to install. For more information, please contact me at +359 888 50 50 45. I am a professional marine electronics technician with over 20 years of experience. I have worked on a wide range of Suzuki outboard motors and have a deep understanding of their electrical systems. I am happy to provide advice and assistance to anyone who is having trouble with their Suzuki outboard motor. I can also provide a detailed wiring diagram for the NMEA 2000 network. This diagram shows how to connect the various sensors and gauges to the network and how to power the network. It is a comprehensive guide that covers all the important details. I hope this information is helpful to you. If you have any questions, please feel free to contact me. I will be happy to help.
